what do i want to learn or understand better?

At this stage (A), I want to learn how the software project is going to work, how Scrum works in detail and understand all the roles that occur in scrum, how to use all the tips that have been given in lectures and be able to use all the tips that I have learned to implement it for the project (B). This in order to reach a desired result (A-> B).

how can I help someone else, or the whole team, to learn something new?

(A) by following all the instructions given in lectures / notes or current work, I can learn a lot, and I can also help to move on what I learned (B). In order to be able to help someone else, I should have an understanding of topics that will occur to achieve a determined result (A-> B)

what is my contribution towards the team's application of Scrum?

(A) My contribution has been to be a member of the Scrum, but I would like to try to be a master some day in the future (B). In order to be what I'm looking for, I have to show more leadership properties (A-> B) .

What is my contribution to the team's deliveries?

(A) My contributing to the lego game was to be a part of the group that built the lego, I liked that role. I want to contribute more by engaging me more to make the group better (A-> B).
