Reflections week 2

what do i want to learn or understand better?

(A) from previous weeks I learned what I wanted to learn about software engineering, ie how the team has to work, how to put sprints, and even got an idea how to write backlogs, sprint backlogs and even user stories, This week i was able to get start with The Android Studio , there i could put some code and use the Android Car emulator.

(B) What I want to do next, is how to write sprint backlogs in detail and to write user stories using the agile method, My ambitions for the coming week is to understand the Car API and even have a better understanding on how the android Studio will work.

(A-> B) in order to achieve a good result, I need to be more involved in the team, ask questions to improve my self both as a programmer and as a team member , be able to use all the tips that have taken place in the course and also read more on my own to have better understanding.

how can I help someone else, or the whole team, to learn something new?

(A) When the ream where getting start to install the Android Studio there was some difficulties to install the application, I was a part of the the team that had discussion on how to solve the problems that occurred. (B) in order to be able to help someone i our team in the coming weeks, I must be able to have good understanding about the Android API, and also to refresh my skills on Java application Language incase someone would ask me,

(A-> B) To be able to get there i want ro be, I have to have good

what is my contribution towards the team's application of Scrum?

(A)My contributions have been the same as last week, ie I've only been a part of the team.I have not yet contributed much enough to have a role as scrum master,

(B)To be a better participant in the team, I have to contribute more than I do today, i have also to take more responsibilities (A->B),

What is my contribution to the team's deliveries?

(A)When the ream where getting start to install the Android Studio there was some difficulties to install the application, I was a part of the the team that had discussion on how to solve the problems that occurred, when the team had meeting this week and discussed how the application will look like, i contributed with coming up with ideas and improving methods.

(B) for the next time, I want to contribute by participating in all meetings that our group have, as well as getting prepared and ready for all meetings that our group have (A-> B).
