DAT-256 Software Engineering individual reflection: Rickard Gyllensten

- **what do I want to learn or understand better?**

  This week has been a disaster from my part. I've been down with the flu the whole week and haven't gotten well yet. I haven't reached my goal from last week. I am behind in my knowledge in android studio. I did not complete any tasks from the scrum board and i feel stressed out. Neither did I Contribute much to the team reflection (A). I would like to be at the same level as the others so I feel like i can contribute again to the project(B). To get there more time has to be put into the project the upcoming week(A->B)

- **how can I help someone else, or the entire team, to learn something new?**

  Since I am behind already, it will be mostly me who needs to learn from the others(A). I'd like to be on the same step as the others in the group(B) To get to the same level as the others i need to ask a lot more questions than i usually do((A->B).

- **what is my contribution towards the team's application of Scrum?**

  This week the discord server was created and everyone in the group was invited. Otherwise i haven't contributed much at all(A). As i mentioned earlier I want to be at the same level as the others(B). I need to work harder and give the project more of my time(A->B).

- **what is my contribution towards the team's deliveries?**

  My contribution this week as been to create the discordsever (A). My goal is like last week, to be more active, contribute more the the team reflection and overall work more on the project(B). To get there i need to put more of my time on the project instead of the other course(A->B).
